New
Cockpit-Technology:
BAC-Fuel-Phone
transmits fuel-data to
your smart-phone or
android-tablet

Brief description: A transducer used for fuel-flow measurement will be installed into the fuel line to carburator or fuel injector. The transducer is powered by the aircraft voltage system. By the fuel-flow the transducer generates a square wave signal in the transducer which is conducted into the BAC-Fuel-Phone-Box and generates the signals to be transmitted to your android tablet or android smart phone. Your tablet or smart phone works as fuel-flow-indicator.

**BendixKing
Stand: A3 - 404

**Introducing our
smallest, lightest
active noise cancelling
aviation
communication
headset ever.**

New features include three user selectable levels of noise cancellation, a unique tap control for talk-through communication and quick release, side-swappable boom microphone and down cable. All engineered into a form factor unlike any other headset - a highly stable, in-ear configuration without the usual intrusive deep-insert ear tips. The new Bose ProFlight is FAA TSO and EASA E/TSO-C139a certified.

Breezer Aircraft
Stand: B1 - 207
www.breezeraircraft.de

Jens-Patent-Weg 1

Contact: Wolfgang Nitschmann
Company: Breezer Aircraft GmbH & Co.KG
Internet: www.breezeraircraft.de

The Breezer Sport, a completely new aircraft with totally different technology approaches.

Breezer Aircraft has developed during the last years the design complementing of the proven B400/B600 series focussing on speed. It ended up in the Breezer Sport, a completely new aircraft with totally different technology approaches, but the same design harmony. A special focus is the retractable landing gear. „Metal made in Germany“ as well. The Breezer Sport is prepared to carry the Rotax-engines 912 UL, ULS, IS up to 915.

Curti Costruzioni Meccaniche

Internet: www.zefhir.eu

Curti Aerospace
Division introduces
Zefhir: the new
helicopter brand for
air mobility needs.

Aero 2018 will see the first public appearance of Zefhir: a perfect synthesis of intuition and competence engineered for the best flying experience. Featuring a futuristic carbon fiber airframe, turboshaft propulsion and exclusive safety systems including a ballistic parachute it will be revealed on the 18th of April at 2.30 p.m at our stand B5 -101. Everyone is welcome. Don't miss the unveiling!

Flybox Avionics
Stand: A6 - 405
www.flyboxavionics.it/en

Via Mortara 192-194
27038 Robbio
Italy
Tel.: +39 384670602

Flybox Avionics new
Omnia57, flight /
engine data digital
color instruments.

The Omnia57 line is a whole family of instruments created to upgrade the old legacy avionics, introducing plenty of new features and alarms for an easier and safer flight experience. New high brightness, sunlight readable tft screen. Usb connection allows an easy firmware upgrade and remote diagnostic. A double Can-Bus allows the Omnia instruments to be connected in cluster and also to the other Flybox bigger instruments.

Magnus eFusion
Magnus eFusion is an
electric-driven
two-seater composite
aircraft.

eFusion, with its electric drive system developed by Siemens, offers technology that is universally unique at an affordable price. This aircraft is perfectly suitable for PPL, soft aerobatic and upset recovery training due to the side-by-side seating arrangement and the aircraft's dynamic performance. The zero-emission technology can be operated at extremely low cost.

**ERB2-H Our new
development with
Intelligent
Synchronization and
FLARM-Interface**

Our ERB2-H complies with FAR23 regulations. Therefore experimental constructors have a genuine alternative to Xenon-Flash lights. The extremely bright, red rotating sequencing light flash has a beacon angle of 360° and is visible at 30° below and above the horizontal plane. Like all our other ACLs, the ERB2-H is completely sealed in high grade optic plastic. As all electronic components are inside the ERB2-H

BZT 2 with ETSO
approval
High-performance
brake assembly with 2
pistons

The brake assembly BZT2 is available in various versions: -for use with a 4", 5" or 6" disk brake wheel -for gliders, motor gliders, UL, aircrafts, helicopters -for brake disks of 5 mm to 8 mm height -Stahlbus-bleeder valve mounted left or right -for use with Mineral Fluid or brake fluid DOT 4
The advantages: small dimensions, light weight, high brake momentum, delivered with EASA FORM 1.

Demonstration of a highly dynamic helicopter 6DoF simulator with virtual reality technology

VRMotion and IPACS demonstrate a 6DoF simulator for helicopters with VR technology. Aerofly FS2, combined with the VRM-200 movement platform built by Brunner Elektronik AG, opens up completely new possibilities in helicopter flight training. The realistic flight physics and a novel motion cuing algorithm developed by the University of Rapperswil together with the detailed landscape result in an authentic flight feeling.

The new composite amphibian BOREY is an ideal choice for private pilots and flying schools

The Borey amphibian in Europe will meet the requirements of the LTF-UL 2018. Therefore, in Europe the Borey amphibian will have the following flight characteristics: Maximum take-off mass 650 kg
Engine - Rotax 912 UL
Maximum cruise speed - 175 km/h
Stalling speed - 67 km/h
Take-off run (water) - 180 m
Landing roll on water - 150 m
Maximum flight range - 760 km
Wave height capability - 0.5 m
See the brochure for details
