

## INFO LETTER

Friedrichshafen, 2012-01-18

### **Limited floor loading within the facilities of MESSE FRIEDRICHSHAFEN**

Dear Sir or Madam,

Due to the widespread damage to our flooring in the past, in particular in foyer WEST, everybody is forced to keep the floor loading limits.

This means that the use of lifting/transport trolleys with polyamide wheels/casters or a polyurethane tire is prohibited inside of foyer EAST and WEST due to concentrated point loading.

Only the following transportation equipment which complies with the weight load limits may be used:

- Wheel barrows with pneumatic tires or
- Transport trolleys with pneumatic tires or full rubber elastic wheels and
- Lifting equipment with swivel casters and fork rollers with full rubber tires.

#### **Weight specifications:**

- inside the halls 5 tons/m<sup>2</sup>
- in the entrance areas/interior areas outside the halls 500 kilogram/m<sup>2</sup>

#### **Please note enclosed layout!**

We kindly ask you to pass this information to your suppliers, exhibition construction companies and your exhibition personnel. Please do not hesitate to contact us for more details.

Yours faithfully,  
Messe Friedrichshafen GmbH
